**Re:** **RML2000 Mass Flow Meter for Bobtails**

## **Convenient horizontal mounting! Enhanced measuring range!**

Actaris US Liquid Measurement is pleased to announce the release of the Neptune RML2000 mass flow meter for LPG delivery (pictured here with Actaris meter mounting bracket and installer-supplied E4000 bracket). Replacing the successful RML1000, the RML2000 retains the accuracy and maintenance-free operation, with exciting new features.

Extended flow range: The RML2000 is NTEP approved at flow rates from 8-82 GPM.

Horizontal Mounting: The RML2000 mounts horizontally, eliminating the need to cut a hole in the deck of the truck and providing easier access to the electronics module for installation and calibration.

For more information, contact Actaris Customer Service at 800-833-3357.
